

Philip Oluwaseyi Oludolamu

DevOps & Platform Engineer | AWS | Terraform | Kubernetes | ArgoCD | CI/CD | Observability

TRNC (Northern Cyprus) | Remote — USA, Canada, UK & Europe | oluphilix@gmail.com | +90 533 876 3067
philipoludolamu.com | github.com/Holuphilix | linkedin.com/in/philip-oludolamu

PROFESSIONAL SUMMARY

DevOps and Platform Engineer with hands-on experience designing and operating secure, observable cloud delivery platforms. Specializes in self-hosted Kubernetes environments, GitHub Actions CI/CD pipelines, Terraform infrastructure automation, ArgoCD GitOps delivery, and full-stack observability with Prometheus, Grafana, and Alertmanager. Experienced building DevSecOps workflows with integrated Trivy, Gitleaks, and Checkov security scanning, automated deployments, and runtime monitoring that improve reliability and operational visibility. Open to remote roles across USA, Canada, UK, and Europe.

TECHNICAL SKILLS

Cloud (AWS)	EC2, ECS, EKS, ECR, RDS, EFS, S3, IAM, VPC, CloudFront, Route 53, Auto Scaling, CloudWatch, ACM, Fargate
IaC & GitOps	Terraform (modular architecture, remote state), ArgoCD, Kustomize, Helm
CI/CD & Security	GitHub Actions, Jenkins, Trivy (image scanning), Gitleaks (secret scanning), Checkov (IaC validation)
Containers	Docker, Kubernetes (self-hosted), Amazon ECS/EKS, Kind
Observability	Prometheus, Grafana, Alertmanager, Node Exporter, Blackbox Exporter, Slack Alerts
Systems	Linux (Ubuntu), Bash scripting, Git, GitHub, Python (basic)

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern	Darey.io — Xterns Program (Remote)	2025 – Present
- Engineered GitHub Actions CI/CD pipelines with Trivy, Gitleaks, and Checkov security gates, reducing manual release effort by ~70% and improving release consistency across environments. - Provisioned AWS infrastructure (VPC, IAM, ECS, ECR, S3) with modular Terraform, cutting environment setup time by ~60% and improving deployment repeatability. - Deployed Dockerized applications to Amazon ECS and Fargate, improving scalability and enabling faster release cycles with reduced server management overhead. - Implemented full observability stack (Prometheus, Grafana, Alertmanager, Blackbox Exporter, Slack) enabling incident detection and notification in under 1 minute.		
DevOps Engineer	Darey.io — Bootcamp Training (Remote)	2024 – 2025
- Developed reusable Terraform modules for AWS services including VPC, ECS, ECR, S3, and IAM, reducing provisioning effort by ~50% and improving infrastructure consistency. - Automated build, security scan, and deployment workflows with GitHub Actions and Jenkins, reducing manual intervention by ~60% and strengthening release reliability. - Containerized applications with Docker and deployed to AWS and Kubernetes environments, improving environment parity and accelerating deployment turnaround by ~40%.		
Career Development Period	Self-Directed Study in Cloud & DevOps	2021 – 2024
Transitioned from IT Support into DevOps through structured self-study in Linux, cloud fundamentals, containerization, and infrastructure automation before entering formal DevOps training at Darey.io in 2024. - Studied Linux administration, networking fundamentals, and cloud architecture principles through self-directed learning and online platforms. - Built foundational knowledge in Docker, Kubernetes, and cloud infrastructure that enabled direct entry into advanced DevOps bootcamp training.		

IT Support Engineer | [Ogun State Internal Revenue Service \(OGIRS\), Abeokuta](#)

2015 – 2021

- Diagnosed and resolved system, hardware, and network issues across departments, reducing recurring downtime by ~40%.
- Installed, configured, and maintained Windows and Linux systems, improving endpoint stability and operational reliability.
- Provided technical support to multiple departments, building strong foundations in systems administration and network infrastructure.

SELECTED DEVOPS PROJECTS

Production-Grade GitOps Platform — June 2026

[ArgoCD](#) | [Kustomize](#) | [Kubernetes](#) | [GitHub Actions](#) | [Prometheus](#) | [Grafana](#) | [Alertmanager](#) | [Trivy](#)

- Delivered a GitOps-driven deployment model using ArgoCD reconciliation and drift correction across dev, staging, and production namespaces with full namespace isolation.
- Standardized Kustomize overlays for multi-environment configuration, reducing environment setup overhead and ensuring consistent Kubernetes state across all tiers.
- Automated build, package, and GitOps config updates through GitHub Actions with integrated Trivy security scanning; validated runtime with Prometheus and Grafana.

Production-Grade DevSecOps CI/CD Platform — May 2026

[Kubernetes](#) | [Docker](#) | [GitHub Actions](#) | [Terraform](#) | [Prometheus](#) | [Grafana](#) | [Alertmanager](#) | [Slack](#) | [Trivy](#) | [Gitleaks](#) | [Checkov](#)

- Cut deployment drift by 90% with infrastructure-as-code validation and consistent environment checks enforced across every pipeline stage.
- Reduced release toll by ~65% integrating GitHub Actions, Terraform, Docker, Kubernetes, Gitleaks, Checkov, and Trivy into one operational delivery ecosystem.
- Enabled <1-minute incident detection with Prometheus, Grafana, Alertmanager, and Slack escalation workflows; delivered reproducible architecture with full documentation.

Production-Grade Observability & Uptime Monitoring Platform — May 2026

[Prometheus](#) | [Grafana](#) | [Alertmanager](#) | [PostgreSQL](#) | [Docker Compose](#) | [Slack](#) | [Node.js](#) | [Platform Engineering](#)

- Engineered a self-service onboarding workflow that reduced manual monitoring setup effort by ~80% for new monitoring targets across the platform.
- Containerized the full monitoring stack with Docker Compose to standardize deployment across API, database, Prometheus, Grafana, and Alertmanager services.
- Implemented uptime, latency, and health alerting with Prometheus and Alertmanager, enabling issue detection and Slack notification in about 1 minute.

Production-Style DevOps Portfolio Platform — April 2026 — Live at [philipoludolamu.com](#)

[GitHub Actions](#) | [Terraform](#) | [AWS S3](#) | [CloudFront](#) | [ACM](#) | [Prometheus](#) | [Grafana](#) | [Slack Alerts](#)

- Automated GitHub-to-AWS deployments reducing manual release effort by ~70%; provisioned HTTPS, CDN delivery, and domain routing as code with Terraform and CloudFront.
- Implemented Grafana dashboards, website uptime probes, and Slack alerting for real-time operational visibility across uptime, latency, CPU, and memory metrics.

EDUCATION & CERTIFICATIONS

B.Sc. Information Technology — National Open University of Nigeria

2024

In Progress

- AWS Certified Solutions Architect – Associate (SAA-C03) — Stephane Maarek, Udemy | Expected 2026
- CompTIA Security+ SY0-701 — Andrew Ramdayal, TIA Training | Expected 2026

Completed

- DevOps Advanced Bootcamp — Darey.io (2025)
- DevOps Foundation Certificate — Darey.io (2025)
- AWS Cloud Certificate — ThinkCloudly (2025)
